Further relaxation of the recent tension regarding the general financial and business outlook was again evident today. There was a significant abatement of the late bear predictions, and about the only check to the advancing tendency of prices was the execution of reanzing orders for both domestic and foreign account. The bears claimed at the close that the greater part of the short interest had been eliminated, and that the market was full of stocks. It is not reasonable to expect the rank and 61e of the recently converted bulb to hold out for more than a few points at a time. The exchange market continues to sag, and to-day actual rates for short and gong bills were reduced to \$5.5% and to-day actual rates for short and

off from the best figures. The average rates had been on a parity with the figures recorded during the last few days, 394 per cent, but shortly before a o'clock bids for small stims, chiefly by bear traders, caused rates to advance to 7 per cent. Small loans were made at that figure, but large offerings of funds rapidly broke the rate to 5 per cent. The volume of business was below the recent average, but the dealings were relatively well distributed, aside from Sugar and St. Paul, which jointly counted for considerably over one-third of the aggregate sales. The tone of the apeculation was confident throughout, and mony stocks touched the highest figures of the advance, some of the gains in the ladustrials and specialities being quite materials trials and specialties being quite materi-

The opening was generally higher despite lower London quotations and at the outset covering of shorts was the main feature.
